

Download Thromboembolism In Orthopedic Surgery

Thromboembolism in Orthopedic Surgery reviews the main topics in thromboprophylaxis around orthopedic surgery, from a general view of the problems with the disease and highlighting them in orthopedics to the new specific protocols involving, for example, new oral anticoagulants.1. Rev Clin Esp. 2018 Nov;218(8):399-407. doi: 10.1016/j.rce.2018.04.018. Prognosis of venous thromboembolism in orthopaedic surgery or trauma patients and use of thromboprophylaxis. Venous thromboembolism (VTE) is an important complication of major orthopedic surgery (total hip arthroplasty-THA, total knee arthroplasty-TKA, hip fracture surgery-FHS) and is associated with significant morbidity and mortality. National Institute for Health and Clinical Excellence. NICE technology appraisal guidance 157. Dabigatran etexilate for the prevention of venous thromboembolism after hip or knee replacement surgery in adults. <http://www.nice.org.uk/nicemedia/live/12059/42032/42032.pdf>.
